SKILLS

- **Frameworks** – **Ruby on rails** | **Spree Ecom** | Laravel | **Filamentphp** | **Nextjs** | JQuery | Wordpress | **Threejs** | Discourse
- **Languages** – **Ruby** | PHP | Javascript | Python | Web(Html,Css,Web-worker) | **Typescript** | **OPP** | **Stimulus** | **OpenAI**
- **Database** – **PostgreSQL** | MySQL | Mongo | **Prisma ORM** | **Active Record** | Eloquent | **Polymorphic** | **Redis**
- **Devops** – CI/CD | GIT | GitLab | **AWS(Ec2,S3,Elastic ip,DNS,Lambda)** | Vercel | Heroku | Live server deploy | **Docker**
- **Ruby Extra** – **Device** | **Prawn pdf** | **Active mailer** | **Active jobs** | Sidekiq | **Active merchant(Payment)** | Authorize.net
- **Others** – **Git** | Project Sprint Plan | Slack | Sidekiq | Agile | LINUX | MAC | **Chrome Extension** | **Hotwire**

EXPERIENCE

NetTantra Technologies(Hyscaler), Bhubaneswar - Software Developer November 2021 - JUNE-2023

Project: Migrating and integrating healthcare eCommerce platform for multiple websites, including a new website (4Romeo, 4Juliet, 4Hamlet-new).

Role: Project Lead

- **Led the migration of healthcare eCommerce websites from WordPress to Spree Commerce, overseeing integration with third-party services like Shippo and Zoho CRM.**
- **Managed project plans, timelines, and resources, ensuring successful completion within scope and deadlines.**

Project 2: Cranberry

- Engineered an in-house employee management system, integrating with IoT for check-in/out, salary access, and other details. Contributed to database design, Dashboard, APIs, and IoT components using Laravel Filament framework.

Project 3: Simple fix rx

Rapidly developed a WooCommerce-free WordPress website using Gravity Forms and Authorize.net for submissions and payments. Integrated Shippo and Doctegrity for prescription management, satisfying the client with timely delivery and paving the way for version 2 development.

Freelancing(6 Months) :- I've delivered three successful projects to clients while freelancing, showcasing my commitment to quality and client satisfaction. Simultaneously, I've dedicated time to developing myself within the realm of open-source projects, particularly working with OpenAI. This journey has been instrumental in honing my skills and contributing meaningfully to the broader developer community

PROJECTS

- **[LINK-SHORT](#)**:- A link shortener built using Next.js, with server-side rendering. MongoDB Atlas was used for the database, and Prisma was used for the ORM. NEXT AUTH for Single Sign-in. The current version is v1.
- **[AGE-CALCULATOR](#)** | **[FILLAMENT LINK SHORT](#)** | TODO APP |
- **[Ai_CAROUSEL_MAKER](#)** :- Developed an AI-powered application enabling the creation of PDF carousels for enhanced productivity sharing within teams.
- **[INSTAGRAM TO PDF GENERATOR](#)** :- Created a Python script that extracts images from Instagram carousels and generates a PDF for seamless sharing across multiple social platforms.
- **[MR_PORTFOLIO](#)** :- Developed an interactive 3D portfolio application utilizing Three.js.
- **[RAILS_STIMULUS_HOTWIRE_APP](#)** :-Engineered a dynamic web application using Rails, Stimulus, and Hotwire technologies.

ABOUT ME:- EDUCATION:-Lakshya Institute of Technology, Bhubaneswar - *BCA* June 2018 - April 2021

I'm a **passionate full-stack developer** who adores **diving into technology's depths, connecting various tech stacks**. I specialize in e-commerce and Ruby on Rails, and I'm driven by **open-source and IoT projects**.
